<https://sidefolio-sable.vercel.app/>

Fullstack Software Engineer with 2 years of work experience in Paris, France. I like building applications that either boost people's creativity or relate to Lux in some way.

Technical skills

Programming	TDD, Accessibility, Unit testing, Integration testing
Languages	Typescript/Javascript, C#, Python
Web frontend	ReactJS, JQuery, design systems (Tailwind, Panda, MaterialUI), SaSS, HTML, CSS
Mobile frontend	Flutter
Backend	NodeJS, ASP.Net, NextJS, Entity Framework, Chi, Backend as a Service (Supabase), PostgreSQL, SQL Server, ExpressJS, REST API
Tools	Docker, Railway, Heroku, Jenkins, Jira, Build tools (Webpack, Vite), Testing tools (Jest, Postman, NUnit), Figma, Axe DevTools, Swagger, GitLab
Project management	Kanban, SCRUM, Agile methods
Communication	French (native), English (C2, TOEIC 990/990)

Experience

Fullstack Software Engineer

September 2022 - September 2024

CEGID — Human Resources — Boulogne-Billancourt, France

- Architected and integrated components, integrating React 16 within a legacy .Net application to modernize features and improve user interfaces
- Developed high-quality, ship-ready code covered by a full test suite (using Jest and NUnit) in a test driven development environment, and conducted technical-design reviews to ensure extensible design across multiple projects
- Resolved accessibility issues with keyboard navigation using Axe DevTools and modern accessibility designs, enhancing the overall user experience
- Engineered a data mirroring system for efficient data retrieval from another internal backend application, leveraging stored procedures in SQL and query optimization techniques
- Collaborated with Product Management, UX/UI, and other developers to translate requirements into technical solutions
- Using ReactJS, integrated a more user-friendly Figma design, as well as developed new backend features in a client facing module that boosted its number of users by 13% in its first quarter after release

Multi-site Hostess

June 2018 - June 2019

DERICHEBOURG Multiservices — Service company — Paris, France

- Worked in various sectors including telecom (Orange), luxury (Puig, Nina Ricci), and medical (Sanofi), demonstrating adaptability to different client needs and environments
- Trained new recruits on internal software systems and operational processes, ensuring they were equipped to handle their responsibilities efficiently
- Developed strategies to optimize visitor flow during peak hours, streamlining the welcoming process to ensure a better client experience
- Managed multiple sites, adjusting to different work environments while maintaining high standards of service

Projects

Radian.io — Art Review App — Technical stack: Python, FastAPI, ReactJS, PostgreSQL September 2024

Github Back: <https://github.com/Londones/radian.io>

An art review app where artists can post their latest piece and other users can review it, the goal being to help artists get better and create an uplifting community. Created as a way to learn Python and FastAPI.

Fractal Renderer — Fun but useless tool — Technical stack: Golang July 2024

Github: <https://github.com/Londones/fractalRenderer>

A simple fractal renderer, used as a way to learn more about Golang, goroutines and play with different ways of creating optimization algorithms. It uses Websockets to update the view in real-time.

Luxy Website Builder — Micro SaaS — Technical stack: NextJS, Prisma, Clerk, PostgreSQL April 2024

Github: <https://github.com/Londones/luxy>

Luxy is a website builder akin to Wix, it allows users to create their own multipage websites. It was built using NextJS. It integrates Stripe funnels for users who wish to sell their own products.

Too Many Lux Skins — Tool — Technical stack: ReactJS Typescript August 2023

Website: <https://londones.github.io/too-many-lux-skins/>

A League of Legends skin roulette to help you choose your skin when your champion has too many (like Lux). It was developed using ReactJS.

Education

Master's degree in software engineering ESGI — Paris, France September 2022 - September 2024

Specialized in web development

Relevant coursework: Web technologies (Symphony, ReactJS, VueJS, API Platform, NodeJS), Native mobile technologies (Flutter), Business marketing, Project management

Bachelor's degree in Computer Science University Paris Cite — Paris, France September 2019 - September 2022

Bachelor's degree in Computer Science with a specialization in Cybersecurity and Web Development

Relevant coursework: Object-Oriented Programming (Java), Algorithmic, Discrete math, Python

Bachelor's degree in English Sorbonne Nouvelle — Paris, France September 2014 - September 2017

English Language, Literature, Cultures, and Societies

Activities

- Member of the technical team in Nijikai a non-lucrative association, tasked with organizing the team's roadmap, set up meetings and figure out the scope of the software development/maintenance part of the team for the year.
- During the Jonetsu convention, organized by Nijikai, I am the Reception Manager of a team of 5 to 6 people. The Jonetsu convention is held (almost) every year. The latest edition was held the 4th and 5th of May 2024 in Bourg-la-Reine, France.
- I also love drawing, some of my artworks are displayed on my portfolio website, baking some mean lime-basil (yes, basil) macarons, and to end on a fun fact, I am a top 3% player on a cookie themed mobile game.
